

SUNNY TECHNOLOGY

Accessories

Each order is shipped with optics customized to suit specific application needs. Your delivery can also include guide light subsystem, beam expander, power supply and D/A converter.

Guide Light Subsystem

F-Theta Lens

Sunny Technology offers application-specific optical F-theta lenses for your application.

Beam Expander

To ensure the best scanning performance, Sunny Technology offers beam expanders with various expansion ratios.

DC Switching Power Supply

The quality of power supply directly affects the scanning performance. Sunny Technology offers high reliability DC switching power supply systems, which is compatible with 110V/220V input.

Mirrors

Sunny Technology offers a range of mirrors with various specifications. We select mirrors according to your application-based wavelength, laser power, etc.

D/A Converter

Our D/A converter is used to convert digital signals into an analog protocol.
